

## Strike-Hold

**GENERAL USE:** (see photos on next page)

Strike-Hold is a fast acting penetrant that immediately cuts through dirt, rust, carbon, and scale to quickly get into metal parts that have become frozen by or encrusted with corrosion and oxidation. This product provides a long-lasting dry lubricant, which reduces friction and will not build up or become brittle. As a demoisurant, Strike-Hold helps dry out wet electrical gears and other water sensitive parts. As a protectant, this product provides a shield-like film against the effects of moisture and corrosion, even against salt water, while actually **REPELLING SAND, DIRT AND DUST**. Strike-Hold contains no CFCs or other ozone depleting substances. Strike-Hold is non-flammable and very safe to use as directed.

## **WEAPONS MAINTENANCE:**

Strike-Hold is a highly penetrating mobile liquid and is intended for field application to satisfy the complete need of cleaning, lubricating, and long-term preservation of both small and large caliber weapons. Strike-Hold facilitates the effective removal of firing residues, gums, and other contaminants from weapon components, while at the same time providing adequate lubrication and long-term preservation for reliable, durable operation in all climatic conditions.

## **ELECTRICAL / COMMUNICATIONS:**

Strike-Hold has an extremely high dielectric strength and will actually improve electrical performance by cleaning and protecting contacts and internal parts, including circuitry and connections. This product will not harm commonly associated materials, such as rubber, most plastics, and wood finishes.

Mike demonstrates Strike-Hold's protective qualities by immersing a weapon treated with the product into a bucket of water. Water beads and the weapon can actually be stored damp without the danger of rust!

Having treated the contact areas of an extension cord, light bulb and light socket, Mike has dropped the lit bulb in water! Strike-Hold's protection prevents water from penetrating through to metal parts, which would have resulted in a blown fuse.

Strike-Hold's incredibly high dielectric strength prevents Mike from being shocked as he immerses his hand in the water containing the lit bulb!

Features	Advantages	Benefits
• Penetrant action	Loosens nuts and bolts and decarbonizes	Saves time and knuckles
• Lubricant	Non-oily, no build-up	Long lasting friction reducer
• Demoisurant	Dries out electrical equipment and metals	Seals out water
• Protectant	Leaves a shield like-film	Prevents moisture and corrosion, REPELS SAND
• Non-flammable	Will not ignite	Safe to use

Where to Use	Recommended For	Directions
<p>Weapons – Communications Equipment  Frozen nuts – Frozen bolts  Switches – Battery Terminals  Lawn mowers – Road Equipment  Fuse Boxes – Air Conditioners  Inboard/Outboard Motors – Engines  Golf Carts – Tools – Lighting</p>	<p>Military – Ships - Airplanes  Municipalities – Office Buildings  Machine shops – Workshops  Hospitals – Factories  Golf Clubs – Boats</p>	<ol style="list-style-type: none"> <li>1. Shake well</li> <li>2. Hold can upright</li> <li>3. Spray</li> <li>4. Wipe off excess if needed</li> </ol>

### Specifications

Spray Pattern.....pinpoint  
Appearance.....amber liquid  
Flammability...nonflammable

Fragrance.....characteristic  
Shelf life.....1 year min.  
pH.....N/A

Dielectric strength.....35,000  
Net weight.....see can  
Propellant.....CO<sub>2</sub>

yes... the troopers love the strikehold!!!!!!!!!!!!!! It is a lot easier to clean a weapon than using the standard WD-40. I even had calls for additional cans for the soldiers. I already emailed the company XO's and supply sergeants on the POC, name and number. LMK if you need anything else

Just a quick "Thank-you!" from 10 very stressed out individuals on the verge of deployment(sometime in the next 72 hours). Your quick response and no-nonsense sales made doing business with you a pleasure. I'm sure our small order is no big deal, but I hope to convince the brass your product is worthy of the whole company. The info you emailed is helping greatly. Thanks again.

SFC Neil Flannery  
ODA 2043

(P.S. The Load planners say "thanks" for the MSDS's. Saved them alot of time.)

Ma'am,

> I am the V Corps Master Gunner deployed in Iraq. I got you compnay  
> information from the CSM of 101st Air Assault. I have forwarded your  
> information to CSM Sparks and SGM Rivera at CFLCC. They may be  
> interested in your product for use in theater. I appreciate your response and would  
like to check out your product for possible use in Germany when I return. As you can  
imagine I am on the go quite a bit here and don't get to check e-mail to often. Thanks  
for your time.

Mr. Huggard,

Thank you for stopping in and showing us your product. I have distributed  
the samples to several units and will send you any feedback I get. I have  
tried and so far am very pleased with the results. more to follow. It was  
pleasure meeting you. Take care.

Joe

"hey, its me. Hows it going? All fine here. Get shot at once in a while. Brightens  
up a dull day. I have an idea. There is going to be a whole country that mey need  
strike hold for their new army, hey? Some reports: use strike hold for .50 cal mg, m-  
249s, m-4s, m-24s, brushing teeth, sore throat, etc. that come from one of the teams.  
They like it. Use it everywhere. I didn't ask anymore. Did not receive the shipment  
that went to ft campbell. It is probably sitting at the staff duty desk. I will try  
to send pictures soon. V44, out"

SFC John Vanden Bosch

May 8, 2003

[The Rangers] used your product yesterday and it worked superbly. I will be promoting it to the 75th as a test location again also. We will be using it again when we get the new class in to see its effects. I am confident it will do well.

CSM Douglas Greenway  
Ranger Training Brigade  
Ft Benning, GA

June 11, 2003

Mike/Deb,

Just wanted to let you know that we haven't forgotten about Strike-Hold. Our initial testing with three separate Ranger classes indicates that Strike-Hold does live up to its reputation. I'll try to get you some feedback specifics, both positive and negative, but the chances are pretty good that we'll be buying some more.

Rangers lead the way!

June 18, 2003

Everyone that I have tried it with is impressed and wants more. They have your card. Currently they are still training and will not be out of the field for at least another week. I am going to another range to test it out on some tank weapons sometime this week.

Robert E. Anderson  
SFC, USA  
USAREUR Master Gunner

June 26, 2003

Hi Mike,

This Frank Kruk, I am the weapons guy on ODA 573 you talked to when you were up to A/3/5 SFG(A) at Ft. Campbell. We got a couple of cases of that Strike Hold you brought up from Fla. I was just wondering how difficult would it be to go through our B-tm and get some sent out here to Iraq? (maybe 24 cans) It has proven to be a great lube and a great cleaner whenever we get these nasty sandstorms. Most of the time when I disassemble my .50 cal after a sandstorm its full of sand, but I just spray and it knocks most of it out. I just let it drain out and wipe it down. The gun is good as new.

Thanks,  
Frank

July 14, 2003

I am currently deployed over seas in Iraq in the war against terrorism. I recently got to use your product on my m4 carbine. I was very impressed with the product and would like to know more information about it and how I can obtain more. thank you for your cooperation.

SPC Boxwell U.S. Army  
B Co 4-31

8/18/03 (in a letter to TACOM)

"I keep hearing about this stuff (Strike Hold) being used over there with the troops. I am hearing that it works. REALLY WORKS...

I know the troops were getting it before they left here last Feb, as I was checking weapons out on the ranges, especially 240B and 249's, I could smell this new stuff. When I asked what it was, I was introduced to Strike Hold. It seems to really do what it is supposed to, kind of like a real Cleaner, Lubricant, preservative.

I know we tried some on some weapons the other week here that had just come back from OCONUS, that were so rusty from shipping moisture we could not charge the M4's. We have some of the strike hold here from the Pharmacy on post, used it on the rusty M4's, and had them working and gaging them in less than a minute. This stuff also kept them from rusting again in their arms room that had no AC, and where their dehumidifiers filled up with water over nite.

Just wondered if anyone is testing it yet. The below message came out of Special Forces from their OCONUS location. If anyone up there is interested, here it is.. I would hate for TACOM to miss a good opportunity to acquire a great weapons lube for the ARMY."

David Foster  
Armament Tech, LSI, Inc  
Ft. Campbell, Ky.

9/16/03

"It was my pleasure to meet you. As I stated during our brief discussion, I was very pleased with the performance of Strike-Hold during my predeployment training and subsequent deployment to Afghanistan. During our predeployment training our team fired some 8,000 rounds of 5.56 ball, 5.56 linked, and 7.62 linked ammunition, and Strike-Hold make cleaning the weapons quick and easy. Following our days at the range, we were able to clean 2 M240's, 2 M249's, and 7 M4 weapons in one evening. I must also mention that during our range days it rained on us constantly, yet we had no problem with rust after using your product.

While in Afghanistan, we were able to clean our weapons and wipe them dry with no adverse effects. During our deployment, it even rained on us (very heavy for the region) and in spite of the fact that the weapons were dry (dust prevention), no one on the team had any problems with rust.

I am pleased with the product and have purchased several cases to support future field experimentation."

Fred DuPont  
NSC Liaison to DBBL  
Ft Benning, GA

10/23/03

"In the maintenance news, I had the opportunity to use Strike Hold on MK19 receivers the other day. Rust spots were showing from the OCONUS (cont'd on next page)  
(cont'd from previous page)

trip. The SH seems to make rust disappear as soon as you put it on. SH also helps us clean the large components of the sear and bolt assembly as we are going through these to get the sand and grit out. Keep up the good product. I have been trying to pass on to anyone OCONUS that it may be a good idea to spray weapons down with your product as they are packed up to be shipped back by boat. I think this would help a lot with the rust problem. I hope the product gets accepted for Army wide use on weapons and other applications. As I believe I have said earlier, on M4's that came back from OCONUS by ship, that were totally, completely locked up by rust and could not be charged, Strike Hold had them working in less than 2 seconds. Matter of fact, they were shootable in that amount of time. It's amazing stuff, keep it up. That is the name of the game, we got to keep the units weapons combat ready. The soldiers lives depend on it. Let me know of any changes you come up with, and on the testing.

De Oppresso Liber  
David Foster (aka SD)  
801st MSB, Ft Campbell Ky.

11/24/03

"My unit and I are in Iraq and we use the hell out of Strike-Hold. It is the best thing on the market."

SGT Shaun Mc Millen, Supply NCO  
82<sup>nd</sup> ABN, Bravo 2/235 Air

5/16/04

"Strike Hold works great. It cleans and lubricates well and yet keeps the sand off unlike regular CLP."

1LT Garrett Anderson, CAV Co. XO  
in Sadr City (near Baghdad)

## **Part II – Commercial/Personal Testimonials**

1/5/04

"This was not the intended reason I have Strike-Hold but this happened the other day: One of the boys drove his radio controlled car hull deep in water. The result was a no-go auto. I had him retire to the garage where I gave the battery pack, motor, transfer case and mother board a good spraying of Strike-Hold. Shook off the excess, reloaded the batteries and drove out of the garage. Cool stuff. Thanks.

PS I also gave my radio a healthy dose on my police motorcycle."  
Curtis Carpenter, Alabama  
Police Officer

1/27/04

"I have used your product for the first time on my Glock this week. I love it. I have never been able to clean and lubricate a pistol or rifle so easy."

Rob Willey, New York  
Schenectady County Sheriff

3/3/04

"All of our SWAT Team guys continue to use your product and everyone is really satisfied with the spray in fact its getting to where everybody has to keep their can locked up or someone will walk away with it!... Whenever we do training with other agencies we tell them about Strike Hold and how it is a product that actually works unlike some of the other stuff out there on the market."

SGT King, Georgia  
State of Georgia SWAT

4/30/04

"Unbelievable product! Bought a case at the show and came home to share it with my neighbors and friends. They are amazed! One neighbor has a lawn service and she is using it on her commercial mowers. Another neighbor is a contractor and he is using it on his tools. We love the stuff!"

Chris Schmutz, Florida

5/25/04

"When I saw Mikes demo (that I wrote about) I knew that your product would take off and do well. I've tried Strike-Hold on a jillion different applications and it is an exceptional product. I've shown it to hundreds of shooters and it is becoming very popular in the Orlando Area. Great product!"

Larry Willis, Florida  
Innovative Technologies

## **Strike-Hold vs. Other CLP's\* (Cleaner/Lubricant/Protectants)**

### **Strike-Hold**

Has capillary action – Works its way deep into rusty/corroded parts, even against gravity and penetrating under water!

Dry lubricant – Does not attract, sand, dust & particulates. Will not become brittle, crack or fall off. Freezing point is -65 deg F!

No build-up – Can be repeatedly sprayed onto surface without gumming up or build-up

Non-Flammable by flame projection test – and Will not ignite due to inert CO<sub>2</sub> propellant

Get more for your money! – Due to high up quality CO<sub>2</sub> propellant, one 16 oz. can only of Strike-Hold contains 12+ oz. of product, that's over 75%!

Demoisurant – Cuts through water to dry surface out electrical equipment and metals, even under water!

Very High dielectric strength of over 38,000 volts – Completely coats electrical connections allowing electricity to pass through but keeping out corrosion and oxidation, even in salt water!

Long lasting protectant – Leaves a shield-rust like film coating and friction reducer on metal's surface which lasts months

Will not hurt rubber, paint and most plastics! plastics, paint, etc.

### **Other CLP's**

No capillary action – Stays on surfaces only without

Leave oily residue which collects dirt and grime and/or dry, harden and crack off.

Quickly builds-up on surfaces

Use highly flammable propane butane propellants

Use weak propellants which take approx. 80% of the can so you get 18 to 21% product

Runs off or stays on water's

Low dielectric strength – CLP is easily broken down with electrical current

Coating lasts only days allowing and corrosion to develop again quickly

Quickly react with and break down rubber,
